For plastic food contact articles - DPET Virgin

- Commission regulation (EC) 1895/2005 on the restriction of use of certain epoxy derivatives in materials and articles intended to come into contact with food with possible amendments.
- Regulation (EU) 1169/2011 – concerning absence of the listed allergens in Appendix II.

All products are suitable for its intended use and have been tested for possible contamination and hazards (interactions) towards products and consumers. Migration tests have therefore been carried out. See Normpack certificates on www.pluspack.dk

Plus Pack will always assist in the choice of packaging, but the packer is ultimately responsible for choosing the right packaging for the product/process. The products must be tested until end shelf life time by correct packaging trials to avoid process problems – product smell, taste or visual deformation of the total end product. Potential re-use of the packaging is depending on both production process and product, and subsequently the re-use ability must be tested/documentated by the packer/producer.

Migration tests:

The migration test conditions are as follows (EU Regulation 2011/10). Test conditions from a higher OM level are accepted.

- 10 days at 40 °C (OM2) in 10 % ethanol (Simulant A)
- 10 days at 40 °C (OM2) in 3 % acetic acid (Simulant B)
- 10 days at 40 °C (OM2) in Olive oil (Simulant D2)

All specific migration limits are met.
